How does AbaWeb work?

AbaWeb is a cloud-based Abacus software,
that allows you to easily use and individually combine
various Abacus modules on a subscription basis.
Whether you only want to use part of the Abacus
Business Software or need the whole package -
with AbaWeb you have full control.

As an AbaWeb customer, you can count on simplified cooperation with us, your AbaWeb
provider. Our software helps you automate and streamline your processes, saving
you time and resources. You get exactly the information you need to make informed
decisions and increase your efficiency.

We offer flexible subscription models that allow you to adapt the software to your needs
at any time. So if your needs change in the future, you can easily return to AbaWeb.

Discover the many benefits AbaWeb has to offer now and let our software convince you.
Get started today and experience an optimised and more efficient way of working.

The choice is yours

- AbaWeb subscriptions provide decision-makers with exactly the information they need to make informed decisions.

- With AbaWeb you are not forced to subscribe to a complete package, but only to those modules of the Abacus Business Software that are important to you.

- As a start-up, you can even work with our AbaNinja software free of charge.

- Once your needs increase, we recommend using AbaWeb.

Advantages & Highlights

All Abacus modules are accessible without an interface since they are fully integrated into the ERP. For every need there is a suitable solution from Abacus' modular expandable software palette.

Scalable costs

The software is purchased as a service (SaaS). This means no direct costs for IT infrastructure. The usage costs can be calculated exactly.
